

CLIP AND METHOD OF MANUFACTURING THEREOF

ABSTRACT OF THE DISCLOSURE

A clip for use with sound-absorbing material in the use of a roof deck. The clip includes a body, a step portion and first prong member. The body has a first side and a second side. The first prong member projects outward from the first side of the body. The clip may include a second prong member with the first and second prong members bent transverse to the body in a first direction and the step portion is transverse to the body in a second direction. The prong members may have a pointed end and at least one barb along a length of the prong members.
